This engine is Tier 3 EPA, EU Stage 3A and Japan emissions certified; "ecot3" - ecology and economy combined with Komatsu technology to create a high performance engine without sacrificing power or productivity.

Environment-Friendly Clean Engine

The PC300LC-7 gets its exceptional power and work capacity from a Komatsu SAA6D114E-3 engine. Output is 184 kW **246 HP**, providing increased hydraulic power and improved fuel efficiency.

Komatsu SAA6D114E-3 is EPA Tier 3 and EU stage 3A emissions certified with NOx emission reduced by 33%. The SAA6D114E-3 engine adopts the electronically controlled Heavy Duty HPCR* fuel injection system.

*HPCR: High Pressure Common Rail

Hydraulics

Unique two-pump system ensures smooth compound movement of the work equipment. HydrauMind controls both pumps for efficient engine power use. This system also reduces hydraulic loss during operation.

Low Operation Noise

The dynamic noise is lowered by 1 dB, realizing a lower operational noise.

Large Maximum Drawbar Pull

Large maximum drawbar pull provides superb steering and slope climbing performance.

Maximum drawbar pull:
264 kN 26900 kgf
59,300 lb

Large Digging Force

With the one-touch Power Max function, digging force is further increased (8.5 seconds of operation).

Maximum arm crowd force (ISO):

160 kN (16.3t) ➔ **171 kN (17.4t)** 8% UP
with Power Max.

Maximum bucket digging force (ISO):

212 kN (21.6t) ➔ **227 kN (23.1t)** 8% UP
with Power Max.

*Measured with Power Max function, 3185 mm 10'5" arm and ISO rating.

Smooth Loading Operation

Two return hoses improve hydraulic performance. In the arm out function, a portion of the oil is returned to the tank smoothly.

Two Boom Settings

Smooth mode provides easy operation for fine work or scraping down operation. When maximum digging force is needed, switch to Power mode for more effective excavating.

Smooth mode
Boom floats upward, reducing lifting of machine front. This facilitates fine work and scraping down operations.

Power mode
Boom force is at maximum for normal production digging.

Automatic Three-Travel Speed

Travel speed is automatically shifted from high to low speed according to the pressure demand on travel circuit.

Working Mode Selection

The PC300LC-7 excavator is equipped with four working modes (P, E, L, and B mode). Each mode is designed to match engine speed, pump flow, and system pressure with the current application. This provides the flexibility to match equipment performance to the job at hand.

Working Mode	Application	Advantage
P	Power mode	<ul style="list-style-type: none"> Maximum production/power Fast cycle times
E	Economy mode	<ul style="list-style-type: none"> Excellent fuel economy
L	Lifting mode	<ul style="list-style-type: none"> Hydraulic pressure is increased by 7%
B	Breaker mode	<ul style="list-style-type: none"> Optimum engine rpm, hydraulic flow for breaker operation

Power/Economy Mode

The PC300LC-7 offers two operator selectable working modes. Power mode for severe or high production applications. Economy mode allows significant fuel savings at slightly reduced production levels.

Lifting Mode

When the lifting mode is selected, lifting capacity is increased 7% by raising hydraulic pressure.

WORKING ENVIRONMENT

PC300LC-7 cab interior is spacious and provides a comfortable working environment...

Large Comfortable Cab

Multi-Position Controls

The multi-position, PPC (pressure proportional control) levers allow the operator to work in comfort while maintaining precise control. A double-slide mechanism allows the seat and controllers to move together or independently, allowing the operator to position for maximum productivity and comfort.

Low Cab Noise

Cab is highly rigid and has excellent sound absorption ability. Thorough improvement of noise source reduction and use of low noise engine, hydraulic equipment, and air conditioner allows this machine to generate a low level of noise.

Low Vibration with Cab Damper Mounting

PC300LC-7 uses a multi-layer viscous mount system that incorporates longer stroke and the addition of a spring. The new cab damper mounting combined with high rigidity deck reduces vibration at the operator's seat.

Photo may include optional equipment.

Seat Sliding Amount: 340 mm 13.4"

Comfortable Cab

Wide spacious cab includes seat with reclining backrest. The seat height and longitudinal inclination are easily adjusted using a pull-up lever. Seat can be fully reclined with headrest attached.

Pressurized Cab

With automatic air conditioner, air filters, and a higher internal air pressure (+6.0 mm Aq + 0.2" Aq), external dust is prevented from entering the cab.

Automatic Air Conditioner

A 6900 kcal **27,400 Btu** air conditioner is utilized. The bi-level control function keeps the operator's head and feet cool and warm respectively. This improved air flow function keeps the inside of the cab comfortable throughout the year. Defroster function keeps cab glass clear.

GENERAL FEATURES

Cab

OPG top guard level 2 capable, with optional bolt-on top guard.

OPG Level 2 Top Guard (optional)

Front Full Guard Level 2 (optional)

Wide Visibility

Highly rigid cab allows for increased glass area and provides superior all around visibility to work area.

Slip-Resistant Plates

Highly durable slip-resistant plates maintain superior foot traction performance for the long term.

Lock Lever

Makes all hydraulic cab controls inoperable. Neutral start function allows machine to be started only in lock position.

Large Side-View, Rear, and Sidewise Mirrors

Enlarged left-side mirror and the addition of rear and side mirrors allow the PC300LC-7 to meet new one-meter boundary ISO visibility requirements.

Pump/Engine Room Partition

Pump/engine room partition prevents oil from spraying on the engine if a hydraulic hose should burst.

Thermal and Fan Guards

Thermal and fan guards are placed around high-temperature parts of the engine and fan drive.

Large Hand Rail

MAINTENANCE FEATURES

Self-Diagnostic Monitor

The PC300LC-7 features the most advanced diagnostics system in the industry. This Komatsu exclusive system identifies maintenance items, reduces diagnostic times, indicates oil and filter replacement hours and displays error codes.

Continuous Machine Monitoring System

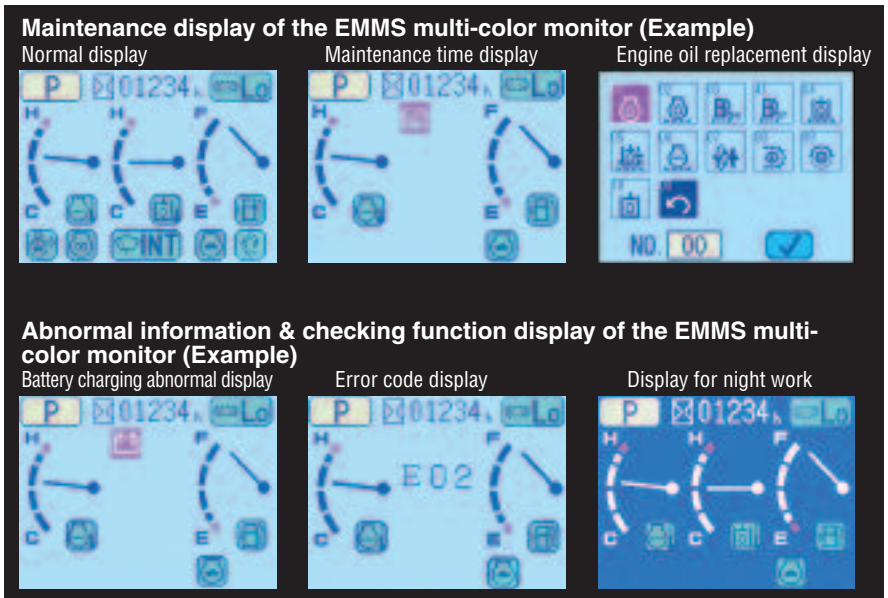

When starting switch is turned ON, check-before-starting items and caution items appear on the liquid crystal panel. If abnormalities are found, a warning lamp blinks and a warning buzzer sounds. Continuous machine condition checks help prevent the development of serious problems and allows the operator to concentrate on the work at hand.

Easy Maintenance

Komatsu designed the PC300LC-7 to have easy service access. We know by doing this, routine maintenance and servicing are more likely to be performed, which can mean a reduction in costly downtime later on. Here are some of the many service features found on the PC300LC-7.

Easy Radiator Cleaning

Since radiator and oil cooler are side-by-side modules, it is easy to clean, remove, and install them.

Abnormalities on Electronic System Display with Code

When an error occurs during operation, a user code is displayed. When an important user code is displayed, a caution lamp blinks and a warning buzzer sounds to prevent the development of serious problems.

Easy Access to Engine Oil filter and Fuel Drain Valve

Engine oil level check, oil fill port, and fuel filter are one side mounted to improve accessibility. Engine oil filter and fuel drain valve are remotely mounted to improve accessibility.

Maintenance Function

When machine exceeds oil or filter replacement time, the maintenance monitor lights to inform operator.

Trouble Data Memory Function

Monitor stores abnormalities for effective troubleshooting.

Engine Oil Filter

Fuel Drain Valve

Equipped with Fuel Pre-Filter (with Water Separator)

Removes water and contaminants in the fuel to prevent fuel problems.

Equipped with the Eco-Drain Valve as Standard

Provides for easier and cleaner engine oil changes.

Maintenance Costs Reduced

Extended Replacement Intervals for Hydraulic Oil and Filter/Engine Oil and Filter

High performance filters are used in hydraulic circuit and engine. Longer hydraulic oil filter, engine oil, and engine oil filter element replacement intervals significantly reduce maintenance costs.

Engine oil & Engine oil filter	every 500 hours
Hydraulic oil	every 5000 hours
Hydraulic oil filter	every 1000 hours

Extended Work Equipment Greasing Interval

High quality BMRC bushings and resin shims are installed in the work equipment, excluding bucket, extending greasing interval to 500 hours.

High-Capacity Air Cleaner

High capacity air cleaner is comparable to that of larger machines. The large air cleaner extends filter element life and extends service intervals.

High-Pressure In-Line Filter

The PC300LC-7 has high pressure in-line filters installed at the pump discharge ports. This protects the hydraulic system from contamination due to the unlikely event of a pump failure.

RELIABILITY AND FEATURES

High Rigidity Work Equipment

Thanks to large cross-sectional structures, thick high tensile strength steel, and partition walls, the boom and arm exhibit excellent durability and are highly resistant to bending and torsional stress.

Sturdy Frame Structure

The revolving frame, center frame, and undercarriage are designed using the most advanced three-dimensional CAD and FEM analysis technology.

Reliable Components

All of the major machine components, such as engine, hydraulic pumps, hydraulic motors, and control valves are exclusively designed and manufactured by Komatsu.

Highly Reliable Electronic Devices

Exclusively designed electronic devices have passed severe testing.

- Controllers
- Sensors
- Connectors
- Heat resistant wiring

Metal guard rings protect all the hydraulic cylinders and improve reliability.

DT-Type Connectors

DT-type connectors seal tight and have higher reliability.

Grease Sealed Track

PC300LC-7 uses grease sealed tracks for extended undercarriage life.

Track Link with Strut

PC300LC-7 uses track links with strut providing superb durability.

O-Ring Face Seal

Hydraulic hoses are equipped with O-ring seals versus conventional taper seal, to provide extended leak-free life.

LCD Multi-Function Color Monitor

LCD Color Graphics Screen

LCD multi-color monitor displays color graphics as well as character display. Color variation in the display screen contributes to improved visibility

Display screen during nighttime hours (working light "ON")

Hydraulic Pump Oil Flow Adjustment System

When installing attachments, it is possible to adjust hydraulic pump flow to match attachment requirements. Selection is possible through the LCD (Liquid Crystal Display).

Breaker mode selected, one-way flow.

Flow rate can be adjusted according to the breaker requirement.
